

Linklite® LED 110V

LONG DISTANCE TEMPORARY FLOODLIGHTING

Lighting long stretches of road, rail track or tunnel is now easier and more efficient than ever with the LinkLite LED temporary lighting system.

Go further with Linklite LED

Linklite is designed to be daisy chained to illuminate long distances. With Linklite LED it's possible to floodlight in excess of half a kilometre using less than 2KW of generator power.

Stackable components

The luminaire, telescopic mast and steel basket all detach and stack for easy transportation and convenient storage.

Save over 80% in running costs

Compared to a standard 4000W light tower, a string of Linklites will light the same distance for less than one fifth of the running cost.

Water, dust and shock resistant

IP44 rated for outdoor use. IEC 60309 industrial plugs and connectors. Highly durable polycarbonate

Rated voltage	110V	Lamp CCT	6500K
Rated wattage	30W	Rated temperature	50°C
Ingress protection	IP44	Luminaire length	54.6 cm
Replaceable bulbs	Yes	Luminaire width	27.3 cm
Total lamp lumens	4,000	Luminaire height	13.5 cm
LED lifespan	20,000+ hours	Luminaire weight	2.7 kg
Complies with	ICE 60598 - 1:2014	Mast height	1.8 m-2.4m
